What do you do? How do you describe your role, duties, and responsibilities? Please be specific. **Manager Evaluation Employee Evaluation** Response: Response: As a Senior Developer, I am mainly responsible for analysis and design, features implementation, bug fixing, and deployment of applications. I also mentor other developers in my team, and provide support for other teams if necessary. What processes do you perform? Please refer to the specific process maps or procedures for the tasks you perform, manage, or have impacted. If no process map exists, please describe the task and write "no process map or procedure". Manager Evaluation **Employee Evaluation** Response: Response: I perform requirements analysis, solution design, code implementation, and application deployment processes of software development life cycle. What metrics do you use to manage your performance? How do you know you are doing a good job? Please be specific (number of calls per day, number of closed loans per month). Manager Evaluation Employee Evaluation Response: Response: We use Azure DevOps task board with the expectation of completing our task assignments within the allotted period. How do you report progress to your supervisor? (What reports, meetings, etc?) Manager Evaluation **Employee Evaluation** Response: Response: We conduct daily status meetings. Our Tech

Which processes / routine tasks have you improved / suggested improvement? What are the specific improvements suggested or made? a. Please refer to specific process maps and procedures for the processes you perform, manage, or have impacted, or if you have created a new process, please

	Employee Ev	Employee Evaluation			
Response:	Response:	We are currently working on an existing project to handle and generate NACHA files But the current implementation is linear, making the codes difficult to analyze and maintain. I introduced an object-oriented approach by implementing an object model hierarchy to make the development process easier.
